

Wetland Plant Identification and Restoration Course

Can you identify this species of arrowhead (*Sagittaria*) by the flower?

This course represents an opportunity to learn about the work of the Wetland Restoration Team (WRT) and receive initial plant identification training which will aid in your participation with the Team. The classes will count towards advance training for Master Naturalists, even if you have taken the course previously. You may also receive volunteer hours for your participation in Team workdays.

Due to the popularity of the course and the limitation of the classroom size, we are limiting our class size to 22 students. You **MUST** register with Marissa Sipocz (m-sipocz@tamu.edu) by July 31, 2015 and receive a confirmation email to reserve a spot in the course. **Fee for this class is \$30** (cash preferably).

Wednesday, August 5, 2015, 9am to 12noon, State Parks Region 4 Headquarters

Wetland Plant Identification Class 1: Plant Terminology

Wednesday, August 12, 2015, 9am to 12noon, State Parks Region 4 Headquarters

Wetland Plant Identification Class 2: *Sagittaria* and associated plants

Wednesday, August 19, 2015, 9am to 12noon, State Parks Region 4 Headquarters

Wetland Plant Identification Class 3: Sedges and associated plants.

Wednesday, August 26, 2015, 9am to 12noon, State Parks Region 4 Headquarters

Wetland Plant Identification Class 4: Wetland grasses and associated plants.

Wednesday, September 2, 2015, 9am to 12noon, State Parks Region 4 Headquarters

Wetland Plant Identification Class 5: Rushes and associated other plants

Classes will consist of lab-oriented lecture with raw materials available per class. A Team notebook (with plant identification plates and other relevant materials), and a quick reference wetland plant flip book will be provided to student on the first day of class. Classes are mandatory to complete Wetland Restoration Team requirements. **Preference will be given to registrants who commit to 35 hours of service to the Wetland Restoration Team.** Participation in the WRT does not require that your Master Naturalist training be completed. Carpool opportunity will be available from our office, 1250 Bay Area Blvd, Houston, TX 77058.
